CAREER PROFILE

- UNSW Commerce graduate specialising in Financial Technology and Information Systems
- Leveraged AI tools to accelerate prototyping and improve project workflow efficiency
- Bridged the gap between clients and technical teams to translate business needs into actionable product features
- Applied SQL, Power BI and Excel to analyse complex data and generate actionable business insights

EDUCATION

Bachelor of Commerce (Financial Technology & Information Systems) | UNSW **Aug 2023 - Expected Dec 2026**
WAM: 72

RELEVANT EXPERIENCE

Project Management Intern **Dec 2025 - Feb 2026**
Justhings AI (AI Software Startup), Taiwan

- Translated client needs into actionable product features across 3+ AI software projects in collaboration with technical teams
- Leveraged AI tools to accelerate prototyping, streamline workflows and improve delivery efficiency
- Facilitated daily Scrum stand-ups to track deliverables, resolve blockers and maintain project progress
- Presented proposed solutions to clients and stakeholders and incorporated feedback into subsequent development

RELEVANT PROJECTS

UNSW Database Management & Big Data Infrastructures Course **May 2026 - Aug 2026**

- Designed an Oracle relational database to structure operational data and support accurate data management
- Leveraged SQL to design and build a data warehouse, transforming transactional data into structured datasets for reporting
- Built Power BI dashboards to analyse operational efficiency and support data-driven decision-making (High Distinction)

UNSW Introduction to Business Analytics Course **Feb 2026 - May 2026**

- Analysed 10K+ transactions using Power BI and DAX to evaluate product performance, revenue trends and profitability
- Developed interactive dashboards to identify revenue concentration, pricing inefficiencies and profitability trends
- Translated analytical insights into actionable recommendations on pricing and product positioning

EXTRACURRICULAR ACTIVITIES

Student Executive - Arc Delegate **Sep 2025 - Sep 2026**
Taiwanese Student Association (TSA), UNSW

- Coordinated with UNSW Arc and the executive team to manage compliance requirements and resource applications
- Organised a social and cultural event for 25+ participants, managing event logistics and coordinating with the executive team

Algothon Case Competition 2025 **Jun 2025**
UNSW FinTech Society x Susquehanna

- Utilised Python and integrated market signals to test trading hypotheses
- Collaborated with teammates to evaluate findings and communicate strategy decisions

TECHNICAL SKILLS

- **Microsoft Excel** – advanced data analysis, PivotTables, and financial modelling
- **SQL (Oracle)** – designed relational databases and built a data warehouse to support data analysis and reporting
- **Power BI** – developed interactive dashboards, data models and DAX measures for performance analysis
- **Programming & AI** – Python, Generative AI and Claude Code

LANGUAGES

Fluent English, Native Mandarin
